## PROFESSIONAL SUMMARY

Operations and logistics leader with 8+ years of experience managing reverse logistics, warehouse operations, 3PL/4PL vendor relationships, and decommission programs across global data center hardware networks. Proven track record of transforming hardware workflows, returning $110M+ in power capacity, driving multi-million dollar cost savings, and establishing robust SOP and chain-of-custody controls. Strong analytical capabilities in Python, SQL, Tableau, and Databricks. Lean Six Sigma Green Belt.

## PROFESSIONAL EXPERIENCE

**Senior Program Manager | Google | Omaha, NE** — **May 2026 – Present**

- Spearhead Decom L11 operations worth $110M in power return and builds enablement, transforming legacy L10 workflows into scalable L11 processes.
- Support L12 architectural design for reverse logistics across global data center infrastructure.
- Lead logistics induction for new, leased, and refurbished components into end-to-end supply chain and serving racks, serving as the warehouse and data center operations logistics Subject Matter Expert (SME).

**Program Manager – Global Server Decommissions | Google | Omaha, NE** — **Aug 2025 – May 2026**

- Spearheaded strategy to centralize reverse logistics within the global warehouse network, enabling a projected >600% increase in ML hardware growth while unlocking reductions in fleet-wide labor costs.
- Re-architected the vendor performance framework for Decoms and Reconfigs by redefining ownership and categorizing blocker data to root causes, unblocking 400+ global projects in the first week of deployment.
- Launched the first centralized reconfigs hub to consolidate metrics, SOPs, and escalations, driving operational consistency for 30+ Program FTEs and 1,000+ vendor associates across the global 3PL ecosystem.

**Program Manager – Upgrades & Media RMA | Google | Omaha, NE** — **Aug 2024 – Aug 2025**

- Scaled global logistics programs delivering $22.6M in savings by accelerating upgrade & Media RMA operations and reducing global cycle times by 50%.
- Revolutionized order change management velocity by slashing cycle times from weeks to under 3 days, unlocking $63.5M in projected value through cross-functional workflow optimization across 5 organizations.
- Engineered global HDD packaging transformation securing $3M in annual handling cost savings by shifting to a pull inventory model and eliminating systemic warehouse inefficiencies.

**Project Manager – Reverse Logistics | Google | Omaha, NE** — **Apr 2023 – Jul 2024**

- Delivered $5M in straight-line savings by overseeing vendor scope expansion and centralizing reverse logistics activities for storage media across the NASA region.
- Reduced spend on damaged parts by $60M by developing, distributing, and enforcing compliance with new part protection policies and training materials.
- Collaborated with Upgrades Program Manager to define future upgrade material flow throughout Data Centers, gathering customer feedback to develop novel logistics playbooks.

**Senior Business Intelligence Analyst | Compass | Remote** — **May 2022 – Apr 2023**

- Co-developed Marketing Agent Dashboard automating metric collection across 7 source systems into a single source of truth for total marketing operations performance tracking.
- Updated customer NPS and feedback processes to automate result collection and distribution while introducing new metrics for senior leadership decision-making.
- Owned Executive Support Dashboard delivering monthly performance metrics with granular trend analysis for executive leadership.

**Senior Program / Data Analyst | General Dynamics IT | Remote** — **Jun 2020 – May 2022**

- Created and maintained dashboards monitoring program performance, developing KPIs aligned with contractual requirements for quarterly senior management reviews.
- Identified and implemented process automation opportunities using Python, SQL, VBA, Power Query, and Excel, mentoring analysts on data literacy.

**Production Supervisor | Textron Aviation | Wichita, KS** — **Jul 2019 – Jun 2020**

- Led 17 associates across furniture build and laminate paint areas, improving efficiency rating from 30% to 70% and reducing rework from 20+ items/week to 4.

- Implemented new layout across paint and build areas, increasing usable space and saving $17,000 annually.

**Integrated Supply Chain LDP | Textron | Multiple Locations** **Jul 2017 – Aug 2019**

- Completed 2-year, 4-rotation leadership program spanning Materials, Production, Quality, and Focus Factory Supervision across automotive, aviation, and defense sectors.
- Identified $700K+ in annual savings through aircraft continuity testing research and implemented project cost/schedule dashboards.
- Led new product line to full production, raising internal quality score from 46% to 100% and reducing daily scrap rate from 35% to under 9%.

## EDUCATION & CERTIFICATIONS

**Oklahoma State University:** MBA [In Progress]

**Iowa State University (Ivy College of Business):** MS Information Systems & Business Analytics (GPA: 3.93) | BS MIS & Supply Chain Management | Graduate Certificate in Business Analytics

**Certifications:** Lean Six Sigma Green Belt (Purdue University) | PMP [In Progress] (PMI)

## TECHNICAL SKILLS

**Analytics & Automation:** Python, SQL, R, VBA, Power Query, Databricks, BigQuery, Redshift, DBT

**Visualization & Tools:** Tableau, QlikView, Plotly/Dash, Excel, Django, Bootstrap, Lean Six Sigma
